MOBILE WORK MANAGEMENT SOLUTIONS THAT WORK THE WAY YOU DO

Facility Wizard Mobile Work Order™ interfaces extend the Facility Wizard ease of use and implementation to your facility management staff wherever they go. All of our mobile solutions integrate seamlessly with our asset and work order management software products and can be added at any time.

Beacuse there is not one mobile deployment solution that fits the wide range of facility management needs and work styles, we have developed several real-world-tested mobile solution options to meet the day to day needs of facility management professionals. Our mobile solutions are built from the user's and facility manager's perspective to meet the range of facility management styles and strategies. These solutions range from simple email-based solutions for cell phones to full-featured work order, parts, storeroom and equipment management applications on sophisticated PDAs.

Some of the features and benefits of our Wizard Mobile Work Order™ interfaces includes:

- ◆Alert/notification of tasks while in the field
- ◆Remote closeout of orders
- ◆Entry of time worked while closing out orders
- ◆Creation of new orders
- ◆Searching of work orders by equipment in the field

- ◆Significantly reduced work assignment/closeout cycle
- ◆Increased productivity for workers and administrators
- ◆Increased efficiency of worker travel / time between work
- ◆Administrative users have real time info on worker progress
- ◆Increased satisfaction of facility end users

The bottom line of our mobile solutions is the same as our entire suite of products for facilities and real estate professionals; to make all the complex management tasks of facility managers as simple and effective as possible.

MOBILE WORK MANAGEMENT SOLUTIONS

Email Notification to a Mobile Device

Cell Phone

PDA

SmartPhone (with Web Browser)

The simplest of all our mobile implementation scenarios comes standard with Workorderama™, our award-winning work order management software. If you can send an email from your desktop to the mobile device our software can send email notifications with work order assignment information.
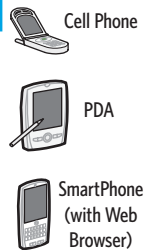

Mobile Device Requirement: Any device that can receive text-based emails from standard email applications. (Pocket PC, BlackBerry etc)

Email Notification with Work-Reply™

Cell Phone

PDA

SmartPhone (with Web Browser)

The Work-Reply™ module allows workers to simply reply to work orders with pre-determined responses which are then reflected real time with the work order management system. For example, with a few clicks and no need to enter anyt data a worker can mark a work order completed which will then update the system and notify facility managers and the work requester, if desired.

Mobile Device Requirement: Any device that: 1) can receive text based emails from standard email applications; and 2) allows for customized 'Replies' to be created for responding to emails;

Facility Wizard Mobile Work Orders™ - ONLINE Worker™
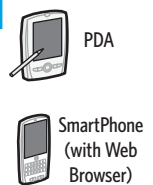

PDA

SmartPhone (with Web Browser)

The Facility Wizard Mobile Work Orders™ ONLINE Worker™ application runs in the web browser of your mobile device. This is a full-featured interface that includes:
- Work order details, notes, preventive maintenance checklist information
- Creating, editing and closing out work orders
- Ability to view, enter and edit time spent on orders
- Equipment information and related work orders

Mobile Device Requirement: Virtually any recent mobile PDA or SmartPhone with a robust web browser. Interface works on PDAs with or without a stylus interface
Network Requirement: Mobile 'Cellular' Network or Wireless LAN.
The online version requires a live connection to the mobile device's network/internet service.

Facility Wizard Mobile Work Orders™ - OFFLINE Worker™

PocketPC PDA

The Facility Wizard Mobile Work Orders™ OFFLINE Worker™ runs as an application on your Pocket PC mobile device. This is a full-featured interface that includes:
- Work order details, notes, preventive maintenance checklist information
- Creating, editing and closing out work orders
- Ability to view, enter and edit time spent on orders
- Equipment information and related work orders

Mobile Device Requirement: Pocket PC
Network Requirement: Wireless LAN (preferred), Mobile 'Cellular' Network or cradle/docking interface for 'downloading/receiving' and 'sending/uploading' of work orders
The offline version does NOT require a live connection to the mobile device's network/internet service to work on, closeout or create work orders.

Facility Wizard Mobile™ for Parts/Storeroom Inventory and Equipment

PocketPC PDA

Manage parts inventory across multiple parts storerooms. Fetatures include tracking parts usage on work orders as well as receiving of parts shipments and physical count reconciliation.

Mobile Device Requirement: PocketPC
Network Requirement: Wireless LAN

ABOUT WORKORDERAMA™

Workorderama™ is for the management of work orders, service requests, asset management and preventive maintenance activities. Available web interfaces, inventory modules, and mobile solutions give you the power to deploy Workorderama™ as a complete CMMS software solution.

ABOUT FACILITY WIZARD SOFTWARE

Facility Wizards' mission is to create the best software and web-based solutions for real estate and facilities professionals. Our customers are always surprised by how simple, powerful, and flexible software can be.

Simple. Making you feel comfortable with your software is our #1 priority. We never underestimate the importance of simplicity and usability.
Powerful. Our systems are built for performance and productivity, with scalable tools and interfaces that reach out to your entire organization and integrate with enterprise applications.
Flexible. Our software starts with all the core features you need and can be easily modified, or custom-tailored to meet your current and changing requirements.

Available modules include work order / preventive maintenance, asset management, facilities project tracking + capital program management, and lease administration.
